MA Natural Sciences and Law,
University of Cambridge
Qualified 1980
Partner 1986

Edward has specialised in intellectual property, especially patent litigation, for 30 years. He has been responsible for more than 50 patent infringement cases, including landmark decisions such as 3M v. Rennicks (validity and infringement, stay of injunction and damages), 3M v. Plastus Kreativ (cross-border injunctions), 3M v. Nippon Carbide (stay pending EPO opposition) and Unilin v. B&Q (entitlement to priority, amendment, reasonable skill and knowledge, res judicata and EPO).

Edward is experienced in all technical fields, including electronics, but is particularly active in the life sciences sector, acting for some of the largest pharmaceutical, biotechnology and medical devices companies. He has developed successful strategies, combining patent and regulatory law, to assist his life sciences sector clients facing the challenge of generics. In such matters, he has often coordinated cross-border litigation and advice.

Edward is on the Board of the European Patent Lawyers Association (EPLAW) and a UK Council Member of AIPPI. He is an Associate of the Chartered Institute of Patent Agents.
